Each different tiles series is produced to meet different performance requirements. For specific product technical performance, please request from **KITO** sales team or their agent or distributor.

Colour Variations: Since the colour reproduction in this printed piece will vary from the actual tile colours, final selection should be made from tile samples. Colour, shade and glaze variations may exist due to the inherent characteristics of porcelain tile.

PORTLAND CEMENT

ANOTHER CEMENT INSPIRED SERIES BY **KITO**

URBANIZATION

Portland Cement was conceived at the very height of the Industrial Revolution where the needs to build better, bigger buildings and infrastructure to accommodate burgeoning industrial demands.

Its namesake was first coined by Joseph Aspdin because of its uncanny resemblance to Portland stone quarried in the Isle of Portland in Dorset, England.

Textured cementous surface marks the characteristic of Portland Cement collection - often derived from the formwork that is employed to hold the concrete cement mix prior to hardening giving the surface look a winning combination of hard and soft elements in one material.

PORTLAND CEMENT

KITO's PORTLAND Cement collection is synonymous with modernity and invoke the urbane chic aesthetic that has been quite the rave.

It has been the primary telltale mark of an urbanized area for the major part of our modern history of urbanization and architecture in general.

Muted cementous textural effects creating a washed yet refined soft sculptural surface capturing the unfeigned essence of cement in porcelain tiles format.
